EDUCATION

Computer Science & Software Engineering

ESAIP – Graduate School of Engineering
2018 - 2021

Networks and Telecommunications

University Institute of Technology
2016 - 2018

SKILLS

Frontend: React, Vue, TypeScript, Next, JavaScript, Redux, Storybook, Jōtai, PWA, SPA, Design System, CSS, Tailwind, Motion, Accessibility (WCAG)

Tools & Practices: UI / UX, Agile/Scrum, Clean Code and Clean Architecture, Design Pattern, ESLint, Biome, Code Review, Pair Programming, Figma

DevOps: Docker, GitHub Actions, GitLab CI, AWS, OVH, Vercel, Netlify

Testing: Jest, Vitest, React Testing Library, Cypress

Backend: Node.js, NestJS, Python, ApiREST, GraphQL

INTERESTS

- Photography
- Competitive swimming
- Club E6 - an entrepreneurs' association focused on leadership, business innovation and peer learning.

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 7 years of experience specializing in React, TypeScript and modern frontend architecture. Proven track record building scalable component libraries and reusable design systems across fintech, SaaS and enterprise products. Strong focus on design-to-development alignment, UI consistency, accessibility (WCAG) and developer experience. Based in French-speaking Switzerland (B permit).

WORK EXPERIENCE

Senior FullStack Developer 2025 - Now

Agenda.ch - Geneva

- Engineered new features for the leading appointment scheduling SaaS in Western Switzerland, contributing to a shared component architecture ensuring UI consistency across the platform (React, TypeScript, Node.js, PostgreSQL)
- Maintained and evolved a high-traffic product serving thousands of independent professionals, with a focus on scalable, reusable UI patterns and continuous frontend quality improvement
- Operated autonomously within an Agile team and a flat organizational structure, collaborating closely with product and design stakeholders to align technical implementation with user experience goals

Senior FrontEnd Developer 2022 - 2025

LeanPay (Fintech)

- Led a full 3-year rewrite of the company's core web application, including the design and implementation of a scalable, reusable component library with consistent design patterns across the product
- Built and maintained a structured UI architecture with clearly separated design tokens, shared styles and atomic components, ensuring visual consistency and reusability across features
- Introduced and implemented a modern frontend stack (React, Vite, TailwindCSS, Jotai, Tanstack Query), with a strong focus on long-term scalability and developer experience
- Set up Storybook for component documentation and visual regression testing, alongside automated test coverage (Vitest, Cypress)
- Applied clean architecture and clean code principles to both business logic and UI structure, enabling predictable component APIs and maintainable design patterns
- Designed a containerized deployment workflow (Docker, CI pipelines), improving build consistency and developer onboarding
- Actively contributed to design decisions and front-end architecture, bridging the gap between design intent and technical implementation

Co-Founder & Senior FrontEnd Developer 2019 - 2022

Arboflow - Decow - Odylae

- Founded and operated 3 B2B SaaS products from scratch, built with React, Next.js, NestJS, and Python Flask and deployed on scalable cloud infrastructures (AWS, Docker, Vercel, Render, Supabase)
- Developed and maintained end-to-end solutions: authentication, dashboards, subscriptions, analytics, SEO, responsive UI, and performance optimization
- Managed full client lifecycle: needs analysis, development, deployment, maintenance, and support
- Built a strong sense of ownership, agility, and product thinking, strengthening my ability to deliver fast and sustainably

FullStack Developer 2018 - 2021

Crédit Mutuel

- Built and maintained a web tool to automate call redirections across the Crédit Mutuel group's call centers
- Worked in a high-security, regulated environment with strong code quality and traceability standards
